Objetivo Programación Dinámica=> Número de Empleados

Una empresa dedicada a la fabricación de piezas de carro iniciara un nuevo proyecto, su Gerente de Recursos Humanos estima las necesidades de personal durante las próximas 11 semanas serán 6,9,6,11,8,7,4,2,8,3,7 trabajadores, respectivamente. La mano de obra en exceso que se conserve le costará \$550(C1) por trabajador semanalmente, y la nueva contratación en cualquier semana tendrá un costo fijo de \$225 y \$350 (C2). La duración del proyecto de acuerdo con la información que le presenta en la siguiente tabla, necesita su recomendación antes de iniciar el proyecto.
